

SUMMARY

Aspiring software engineer focused on robust, scalable products, cloud infrastructure, and low-latency systems. Builds full-stack applications with production-minded architecture and a strong interest in cloud gaming.

EXPERIENCE

Full Stack Engineer Intern - TMA Solutions

Jun 2026 - Aug 2026
Ho Chi Minh City, Vietnam

- Developing end-to-end features for an AI-driven project management application using MongoDB, Express.js, React, and Node.js.
- Writing and optimizing SQL queries while working with NoSQL data for complex datasets.
- Building API test suites and contributing through Agile sprints, code reviews, and engineering collaboration.

PROJECTS

PIXELATED Studio Edition

TypeScript, React, Supabase, Vercel

Creator workspace for managing browser gameplay experiences, local builds, submissions, and stream research. **Technical decision:** Separated creator tooling from the user-facing client so each workflow can evolve independently.

PIXELATED User Edition

TypeScript, React, Web APIs, Vercel

User-facing companion for discovering and accessing experiences produced through Studio Edition. **Technical decision:** Kept authoring and playback concerns in separate deployable applications to reduce coupling.

TECHNICAL SKILLS

Languages	TypeScript, Java, SQL
Web	React, Node.js, Express.js, REST APIs
Data	PostgreSQL, MongoDB, Supabase
Cloud & Platform	AWS, GCP, Docker, Kubernetes, Helm, Terraform, GitHub Actions

EDUCATION & CERTIFICATIONS

VNUHCM - University of Science B.S. Information Technology Sep 2023 - May 2027	AWS Certified Solutions Architect - Associate AWS Certified Cloud Practitioner IELTS Academic
