

NGUYỄN GIA NGHI

Nicholas Nguyen | Ho Chi Minh City, Vietnam

gianghi30032005@gmail.com | 0703540518 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Early-career software engineer with hands-on experience delivering MERN features in Agile sprints and building full-stack, cloud-enabled, low-latency systems. Strong in object-oriented programming, data modeling, API designing, and bottleneck diagnosis; comfortable taking ownership, learning new technologies, and collaborating in English.

INDUSTRY EXPERIENCE

Full-Stack Engineer Intern - TMA Solutions	Jun–Aug 2026 Ho Chi Minh City
- Delivered Jira-scoped bug fixes, product improvements, and small features for an AI-assisted project-management application built with MongoDB, Express.js, React, and Node.js. - Modeled and queried MongoDB data through Mongoose, built API tests, self-tested changes, and refined work through senior-engineer review within Agile/Scrum sprints.	

SOFTWARE PROJECTS

PIXELATED Studio Edition | Full-stack creator platform & self-hosted edge-cloud-gaming system

- Designed and released a TypeScript/React creator platform with a hosted Fastify control plane, Electron host orchestration, and a Dockerized runtime, separating control, execution, and browser-client concerns.
- Engineered secure pairing and sessions, WebRTC media and input, GStreamer capture and encoding, and cross-layer telemetry for diagnosing runtime and network bottlenecks.

[Repository](#) | [Live application](#) | [Releases](#)

PIXELATED User Edition | Browser-based WebAssembly gaming platform

Built and deployed a React/PWA that runs supported retro titles locally through WebAssembly-based libretro cores and instruments launch time, frame pacing, long tasks, capabilities, memory, and errors.

[Repository](#) | [Live application](#)

Edge-cloud-gaming latency diagnosis | Undergraduate thesis & systems project

Built an operational Docker/GStreamer/WebRTC testbed; developing versioned observation schemas, a persistent fingerprint store, and a confidence-reporting matcher to diagnose cross-layer latency bottlenecks.

TECHNICAL SKILLS

Programming	TypeScript, JavaScript, Java, Kotlin, C/C++, SQL
Frontend	React, Vite, PWA, browser Web APIs
Backend	Node.js, Express.js, Fastify, Spring Boot, REST APIs, Socket.IO
Data	PostgreSQL, MySQL, MongoDB
Cloud & DevOps	AWS, GCP, Linux, Docker, Kubernetes, Helm, Terraform, GitHub Actions
Systems & media	WebRTC, GStreamer, telemetry instrumentation, latency analysis

EDUCATION

VNUHCM - University of Science

Bachelor of Science | Major: Information Technology

GPA: 8.34/10.00 (3.58/4.00) | 121 credits completed

Sep 2023–May 2027

Ho Chi Minh City

CERTIFICATIONS & ENGLISH

AWS Certified Solutions Architect – Associate | [Badge](#)

AWS Certified Cloud Practitioner | [Badge](#)

IELTS Academic: 8.0 overall – Listening: 9.0, Reading: 9.0, Writing: 7.5, Speaking: 7.0 (October 2nd 2025)
